**DETAILED ACTION**

***Claim Objections***

Claims 10-25 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

***Allowable Subject Matter***

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior to Nguyen et al. (NPL cited on 1449) discloses the claimed cross-metathesis reaction in the presence of the same claimed ruthenium catalyst. However, no reference was found to disclose or suggest conducting a metathesis reaction in the presence of a phenolic compound. In the specification, there are showings of unexpected results when carrying out cross-metathesis reaction in the presence of phenol, i.e., lower ruthenium concentrations needed, high selectivity to desired products, and greater tolerance to feed impurities.
